DWA_08 Discussion Questions

In this module you will continue with your "Book Connect" codebase, and further iterate on your abstractions. You will be required to create an encapsulated abstraction of the book preview by means of a single factory function. If you are up for it you can also encapsulate other aspects of the app into their own abstractions.

To prepare for your session with your coach, please answer the following questions. Then download this document as a PDF and include it in the repository with your code.

_____

1. What parts of encapsulating your logic were easy?

It was easy to make the details and put those into the factory function.

_____

2. What parts of encapsulating your logic were hard?

It was a bit more confusing to work out what to put into the function. To what extent is it supposed to go?

_____

3. Is abstracting the book preview a good or bad idea? Why?

It's an okay idea in my opinion, but definitely good as a starting example that isn't too complicated for us to learn how to do things.

_____
